Centrumpunkt

Centrumpunkt AI LLC a master in professional IT support for your business.
Including the purchase of telecommunications equipment and its comprehensive configuration, as well as complete information security management.

To do this, we look for and find: points of growth, promising projects, talented people.
We grow with you and analyze every pixel, byte and symbol.

We design and implement the structure and content of the system software
for your business model, ensuring information security.

Our Values

The values of Centrumpunkt AI LLC are guiding principles that focus on **reliability, functionality and professionalism** - the three pillars on which our company stands.

We help our customers achieve digital transformation.
We interact with our customers on an expert level.
We have qualified specialists who are ready to provide a full range of services in the field of information and computer technologies.

We are constantly searching for new opportunities to achieve better results, investing in mastering advanced technologies and being the first to apply them to solve our clients' problems.

We conceive and implement new ideas that change the world for the better, take responsibility for results, consistently achieve our goals and fulfill our obligations in an ethical and professional manner.

We create solutions that add real value for our clients and society.
Achievement and concrete results are the foundation of our leadership.

Our Culture

We move away from the role of a mere performer, our task is to become a reliable partner for the client, on whom you can rely. We use the most advanced and modern methods in our daily work, we use software and equipment from leading manufacturers, and we have a staff of qualified employees with many years of experience in the information technology market.

Our goal is to ensure the successful implementation of the most advanced information technologies into the business processes of our customers. To achieve this goal, we use certified solutions offered by world leaders in software and hardware, as well as our own developments.

We are confident in our future and clearly see the goals, in achieving which we rely on our values and a clear understanding of the company's development strategy.

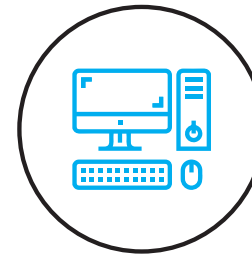

We offer comprehensive IT solutions, computer services and equipment for a successful business, and we consider our main asset professionalism of specialists, that's why the company constantly conducts activities to improve the skills and certification of staff. This approach allows our specialists to always keep up with the development and improvement of new technological solutions. Based on the accumulated experience and knowledge of our employees, we provide our customers with a high level of service at a competitive price.
